

DO NOT OVERRULE New Jersey's DO NOT CALL law.

Even though our phone number is on the Do Not Call list, we still receive two to four hang up calls PER DAY from telemarketers. Their numbers, which appear on my caller id, do not receive incoming calls I can use to ask them to stop. Why should my number be open and available to them?

If the telemarketers want to call me with ads, let them offer to pay people's phone bills. Otherwise, it is not their right to disturb us in my home with unwanted messages and product offerings. Their calls are an invasion of our privacy and disruption and should not be unlawful. Nor should they be permitted to make unsolicited calls to our personal cellular phones.
